### **Reason for Allowance**

1. The following is an examiner's statement of reasons for allowance:

Claims 1-30 are allowable over the prior art of record because none of the prior art of record teaches or fairly suggests a system or method for determining whether to discharge the gas ingested in a hydrodynamic bearing of a spindle motor based on the activity of a host connected to the data storage device comprising the spindle motor, performing a motor spin down routine for the spindle motor if determining to release gas from fluid of the hydrodynamic bearing. It is noted that, the closest prior art, Takeuchi et al (USPN 6,502,989) teaches a releasing portion capable of discharging the introduced gas formed at an outer peripheral of the thrust bearing portion in the radius direction. However, Takeuchi et al fails to disclose a system or method for determining whether and when to discharge the gas ingested in the hydrodynamic bearing.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication from the examiner should be directed to Fred Tzeng whose telephone number is 571-272-7565. The examiner can normally be reached on weekdays from 9:30 am to 6:00 pm.
